

The Cosmology of Walter Russell

Experiential Insights Into How the Universe Actually Works

Allen Adkins

Regardless of whether or not one has heard of the work of Walter Russell, it is of great value to gain a workable understanding of the legacy of this remarkable human being. In our effort to become aware of the truth about the actual real and true Laws of Creation, such as Light, Polarity, Wave Fields, Electricity and Magnetism and gain an understanding sufficient to utilize this knowledge in usable devices, then we need to derive our subsequent understanding on real, genuinely true Universal Principles.

Even though Walter Russell first started publishing and making his teachings available since 1927, with the publication of *The Universal One*, and with the publication of numerous other books, diagrams and paintings, it has proven challenging for most everyone to gain a working understanding of Russell's Cosmology. In this presentation, many of the key and critically important aspects of the Russell's Science of Tomorrow are elucidated.

Just as the Rosetta Stone was key in deciphering Ancient Hieroglyphics, so it will be seen that a workable understanding of Russell Cosmology is key in deciphering many of the most sought after "secrets" of Nature itself and how to harness it for our noble purposes in the very near future. The presentation includes very special 3D animations of Russell's Cubic Wavefield Dynamics, critically important to aid in understanding key points.

Walter Russell's New Science of Tomorrow

A Rosetta Stone for Understanding Next Level Technology

Darren Colomb

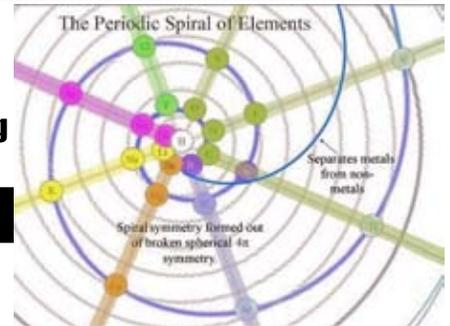

Walter Russell had one of the rarest experiences known to humankind: full Cosmic Illumination into the Light of Consciousness. In this 39 day and night experience he gained all his knowledge of physics, chemistry, astronomy, and advanced metaphysics. Upon reading Walter's first treatise, Nikola Tesla recognized the massive importance of this knowledge and told Walter to "lock it up in the Smithsonian for 1,000 years until mankind was ready for it."

The University of Science and Philosophy is dedicated to empirically proving Russell's scientific principles. We have made significant progress based on the understanding that modern science is still primitive because man himself is still in his early stages of unfolding. We use this *New Science of Tomorrow* to-

The secrets of Tesla's technology are in plain sight, but understanding his achievements eludes researchers due to persistence in applying principles of an inaccurate scientific paradigm. Nikola Tesla made amazing discoveries with his photon/resonance theory of physics and concept of "radiant" energy, but these findings have been suppressed for over a century. Inventors in every category of research are discovering how limitless energy can be tapped by correcting flaws in the paradigm and re-inventing their approach.

Few people realize the power of human body-mind-spirit as the ultimate creative vehicle of quantum energy.

day to invent and describe technology that defies mainstream theories. The laws of Nature never change, but man's theories change frequently as evidence arises. This does not apply to the New Science because we begin directly from CAUSE, and are not prone to the many complexities and need for empirical reasoning as modern science is.

No man can acquire knowledge beyond his range of perception. As long as man's range of perception is limited, his cosmology will be what his sense tell him it is. With new knowledge we can transcend this limitation and live in harmony with Nature rather than fight it in attempt to dominate it.

Tesla's Technology Secrets and Human Quantum Potential

Suzanne Price

Understanding this possibility is to appreciate the limitless sea of energy in the human form and how it may apply to energy devices. The brain is a magnetic wave generator that receives and processes energy patterns, holographically capable of transcending nonlinear time/space faster than the speed of light. Each of the seven trillion cells of the body function like tiny radios in an array of complex protein crystal lattices. The double helix DNA, capable of these same processes, transfers information via water molecules.

This presentation interprets Tesla's hidden discoveries. His insights are compared to findings that Horowitz, Pollack, Merkl, Meyl, Lipton, Veljkovic and others have uncovered about human quantum consciousness and the EM energy body- mind-spirit.
