Robert Golka is researching an approach to existing technology that could produce radiation-free fusion power plants in the near future. For many years we have looked for a way of holding very hot gases without the use of magnetic fields. In 1968, Project Tesla began looking into the research of Nikola Tesla, who, in 1899, was experimenting with a global power system. During his experiments he was repeatedly producing small fireballs that persisted for many seconds after his coil (which at that time was generating 12-million volts) was turned off.

Project Tesla, at Wendover Air Force Base, while testing new design aircraft skins for lightning hardening, built the world’s largest Tesla coil and attempted replication of Tesla’s work. Later research focused on high current experiments using submarine batteries for ball lightning research!

Searching for Answers To Our Energy Needs!

The Manelas device, invented by Arthur Manelas gained prominence after being utilized in a refurbished electric car to recharge batteries. At the core of the device was an enigmatic Black Box containing nanograined \( \text{SrFe}_{12}\text{O}_{19} \) which serves as an oscillating power source. The car has been operating for a couple of years and exhibiting overunity behavior that caught the attention of mainstream scientist Brian Ahern, PhD.

Since learning of the Manelas device, Dr. Ahern applied his theories of nano-magnetism and energy localization. Ferromagnetism may be a collective behavior. Perhaps nanograins impose collective action of the nuclei to vibrate cooperatively which results in the production of clean electrical energy. Experiments are ongoing to fully understand the nature of this device. However, as is the case with any breakthrough technology, experiments outpace theoretical understanding!

A low voltage frequency pulsing through a copper wire coiled around metal oxides spread on a three-inch diameter cardboard tube is revolutionizing health care. This “open” Tesla coil carrying a wide array of weak frequencies separates the oxygen ions from the metals. The patented configuration is a key feature of the device called the Nano Oxygen Accelerator (NOA) that both detects and releases the large oxygen molecules involved with the condition known as inflammation. NOA also has the ability to balance and stimulate the biological processes in human and animal intestines and colons.

This presentation demonstrates techniques to detect both hidden and overt inflammation in the body with the revolutionary use of two “open” Tesla coils. Tesla probably never envisioned the benefits of an “open” Tesla coil yet his basic discovery delivers a new level of benefits.

If cellular aging/disease is electromagnetically induced, can it be reversed or healed via morphogenetic scalar plasma energy? If one can time-reverse the exact information signature initiating the effect, and expose the aged or diseased cells with the correct information pattern, it is possible that the cell could reverse back to its normal, healthy cell.

The USSR’s Kaznacheyev experiments proved cellular death/disease patterns can be induced by a specific EM pattern carried on a signal, if cells are bombarded with the pattern-carrying signals. Unpublished work shows EM reversal of cellular death/disease conditions by irradiating the diseased cultures by phase conjugate replica signals. My experiments go beyond Kaznacheyev and prove that aged, diseased cells and states can be reversed via scalar plasma crystalline technology.

The presentation demonstrates techniques to detect both hidden and overt inflammation in the body with the revolutionary use of two “open” Tesla coils. Tesla probably never envisioned the benefits of an “open” Tesla coil yet his basic discovery delivers a new level of benefits.

Pulsed electromagnetic field (PEMF) therapy has been used to treat almost every human illness or malady, including many inflammatory diseases such as arthritis or psoriasis. It consists of a painless pulsing action most commonly used in healing soft-tissue wounds and suppressing inflammatory responses at the cell membrane level to alleviate pain and increase range of motion in muscles and joints.

PEMF therapy up-regulates the body’s functions and optimizes the body’s ability to heal itself. Each magnetic pulse induces a tiny electrical signal that stimulates cellular repair. It improves the permeability of the cell to take in nutrients and expel toxins by clearing up the cell membrane—the brain of the cell. This outer layer gets clogged with sugars and proteins and becomes “caramelized.” The stimulator clears the pores of the membrane and reactivates or rejuvenates the cell.

PEMF therapy improves the trans-membrane potential of cancerous cells, helping them to activate aerobic metabolism (oxygen), which also reduces inflammation, improves blood flow, and enhances immune function—three actions critical for eradicating cancer!

With the use of new, German made, modified Tesla Coil technology we are now able to see human bodies, animal bodies, soil, water and more with a view into the frequency or energetic realm, which exists all around us, like water to a fish. Gaining this new view of life is paramount to the advantages of helping the body survive in our current environmental state of disarray.

Advances in technology incorporating this technology, has made it possible for computers to communicate directly with the body to determine the various stressors affecting it. These computers also have the ability to create individualized protocols to help the body heal and thrive. Feeding the body appropriately increases the body’s Life Force, brings its chelation system back online and repair/enhance its electrical system!

In today’s complex industrial world we have severe malnutrition, an extremely toxic environment contaminated by petrol chemicals, pesticides, pharmaceutical drug residue, genetically modified organisms and proteins (GMOs) and un-natural living conditions. Wil’s vision is to restore our home, our planet and our lives to a workable and balanced state of health.

With thousands of people now healing most diseases simply, inexpensively and at home. Modern medicine is good at THREE things: Diagnosis, Surgery and Mitigating Symptoms of disease. Modern medicine rarely CURES disease. Cures are not profitable. By mitigating symptoms the patient feels better while the disease often remains. The MOST any Doctor (or anyone) can do is give the body what it needs to heal… The body ALWAYS heals ITSELF!

We are ~ 62% hydrogen by atomic VOLUME, so hydrogen is, without question our most important NUTRIENT. Modern medicine is only now (in the last 5 years) starting to realize the importance of hydrogen, with hundreds of scientific studies that show AMAZING healing with ZERO negative side effects.

Almost everyone is chronically dehydrated; even if they drink lots of water (that’ll be explained). Most diseases are either caused by and/or exacerbated by dehydration (as in lack of hydrogen). When dehydrated, the body shuts down it’s regeneration system (so you scar and age). If dehydration is chronic, the body shuts down it’s immune system (so you get sick).
Overview of years of research regarding energy anomalies from abrupt electrical discharges in water, mist and fog suggest surprisingly easy technology for new energy: Mimic a thunderclap in the cylinder of an internal combustion engine. The plasma from the electrical discharge surrounds each microscopic water droplet, which pinches from electrostriction into a torus to guide the plasma into a vortex ring or “plasmoid.” Ken Shoulders’ lifetime research demonstrated energy anomalies from such forms which include propulsive self-acceleration like an Alcubierre warp drive. An abrupt capacitive discharge through a wide plasma spark plug yields thousands of these entities per down stroke, which manifests a huge excess force on the piston. HHO researchers unwittingly created these microscopic forms in electrolyzers as nanobubbles, which are surprisingly stable. Nanobubbles form on electrolysis plates, but typically grow into unstable microbubbles, which burst to yield molecular hydrogen. However, if the electrode surface is conditioned to form microchannels during a gradual buildup of residue (salt or electrolyte), nanobubbles of hydrogen detach before they grow too large. Stable nanobubbles are the important component of the gas, for they are the basis for abundant micro plasmoid formation.

Ball lightning is a quantum object that possesses unusual properties which can be used in free energy generation, electronics, communications, propulsion, military, biology. Ball lightning is a giant macro-atom composed by 2-D positively charged nucleus and electron shell/cloud around it. Ball lightning possesses three basic quantum properties: constant quantum temperature of its nucleus, nucleus - black hole (no space beneath its closed 2-D surface), quantum electrons forming 2-D shells around its nucleus. All of these unusual quantum properties can be used in practice. The science of ball lightning and technologies based on its quantum properties will change our universal paradigm and impact our everyday life.

Some scientists interested in this unusual natural phenomenon consider ball lightning as stable plasma formation – plasmoid – which obey all known physical laws. However, ball lightning is not a plasma formation! It is a quantum object... one, unique, without internal 3-D composition and structure, obeying only quantum limitations, ignoring/violating in some special conditions some universal physical laws!
Science recognizes that math is the language of the universe. Its divine proportions can be found in all of nature. The Trinfinity8 technology was developed to harness nature’s algorithmic codes to bring about a more effective way to give information directly to the cellular structure of the body. Even such substances as Vitamin C can be transmitted without actually having to ingest the substance. The end result is a tool which brings about faster more positive change.

Trinfinity8 incorporates the ancient sciences of solfeggio sound, fractals, sacred geometry and the use of lab grown crystals to amplify and transmit coded information to the body. Independent lab testing shows this technology to have a significant effect on not only repairing DNA, but rejuvenation and slowing the aging process. A radionics form of transmission can also be used for long distance transformational work.

All aspects of this unique technology and its application will be discussed by Trinfinity8 inventor. Discovering how the ancient sciences of sound, fractals, crystals, and intent can be used to harness incredible healing and spiritual growth inevitably leads to a significantly greater understanding of how mankind’s ancient past is directly linked to one’s awakening consciousness.

Water can be treated in many ways. But does the treatment produce a measurable effect in the water? Indeed! Different bottled waters have distinct measurable properties when measured by the vector network analyzer. We also show that water treatments by different magnet arrangements measure differently. The configurations tested are:

1) **Axial Polarization**: The top surface is the North pole and the bottom surface is the South pole.
2) **Radial Polarization**: The inside circumference of the ring magnet is the North pole... the outside circumference of the magnet is the South pole.
3) **Circumferential Polarization**: The magnetic field is entirely contained within the ring magnet. Water placed in the center of the ring is only exposed to the vector potential field of magnetization which is known to change the spin on electrons.

We also measure the vitality of the treated water by a radionics instrument and are able to differentiate the vitality of the different treated waters. The vitality relates to the healthiness of the water. We concentrate on measuring two kinds of water: one from the Boyce Water Smacker and one from the Wiseman Aquacure water.

This single case study explores the impact plant music therapy has on a human. Music of the plant’s device is a biofeedback system that measures the electrical resistance of vegetable tissue and translates the signals into sound via a MIDI synthesizer. The device allows the plant that is connected to it to control the MIDI synthesizer sound. The plant played music for 55 minutes while the subject reclined in a zero gravity chair and listened to the music the plant played once a week for twelve weeks. A Dark field microscope was used for live blood tests before and after the sessions during the study. To measure emotional effects the subject documented their feelings before and after the sessions. A journal was kept throughout the study to notate additional effects.

Amazingly, the amount of Rouleau went from Extremely Severe to None, Fibrin and Platelets went from Extremely Severe to Very Little, Spicules and Protein Crystals went from Severe to Very Little and the White Blood Cells doubled and tripled in size and activity. The most notable feelings felt after the sessions was comfortable, calm and relaxed. Journal entries noted an overall improvement in energy and endurance levels, balance and strength and steadier walking.
There has been much written about Townsend Brown’s US Patent #2,949,550 regarding his electrokinetic apparatus. Although this design demonstrated the electrogravitics effect, he said this design was inferior to previous and later airfoils. The design of his later airfoils more probably looked like the design in his later patent #3,022,430. While working on his electrokinetic engine during his Project Winterhaven experiments, there was a parallel research project in a search for the best way to power his engine in flight. Brown knew that a heavy transformer type HV power supply would be too heavy and impractical for his aerospace vehicle. He knew that a jet engine turning a large generator would not work well either. The concept of a fan jet type of generator was the best solution for this problem. It will be this generator that I shall focus on in this lecture.

Modern physics shows us that we live in a sea of energy called Zero Point Energy (ZPE). An important concept in modern physics, it is the basis of transmitting force. ZPE can be measured in different ways. Hendrik Casimir developed a setup consisting of only two metal plates that create a difference in ZPE. This Casimir effect leads to a measurable force. This Casimir force has been used by physicists to study the nature of ZPE with micro and nano machines. Ludwig’s published experiments on the Casimir effect and on his ZPE sensor used an Atomic Force Microscope and quartz tuning forks.

The use of this sea of energy can be the foundation for new energy technologies. The ZPE and the Quantum field theory will be introduced in an understandable way with the current line of experiments, using the Casimir effect. A new configuration, special structured surfaces and unique topography will be presented that could be the solution for energy and propulsion needs of the future. This concept can open interesting new ways to tap the Zero Point Energy. It is also time for an update on European free energy research. An overview of amazing new energy technologies from Europe will be presented.
Tesla’s Wardenclyffe Tower and his dream of worldwide wireless energy were destroyed in 1917 by J. P. Morgan, and the powerful titans of American industry shunned his work for the next 25 years. Free energy, tapped from the aether that surrounds us, would have shattered their profits. Recently, a new technology emulating the Wardenclyffe system has resurrected the hope of worldwide wireless power.

One hundred years later Tesla’s dream could be coming to fruition with an ironic twist by the breakthrough introduction of NanoCrystal Electricity technology and an FCC-approved receiver device. Inspired by Wardenclyffe, NCE creators claim it’s a revolutionary method of dynamic charging based on the new technology and radio waves that can provide power anywhere and everywhere. Famous physicist, Stephen Hawking, in response to the new technology reportedly said, “It’s about to change your life.”

This presentation explores NanoCrystal Electricity technology, how it works, how it supports an understanding of energy, and how it parallels Tesla’s original Wardenclyffe vision. NCE technology promises to enhance the development of many other TeslaTech research projects.

Hively’s More Complete Electromagnetic (MCE) theory, demonstrates how the novel concept of “gradient-driven” electrical current provides the missing element in standard Maxwellian electrodynamics. It will provide a basis for consistent understanding of this discipline. Hively’s most recent 2017 trilogy of follow-up papers will also be examined to underscore these basic ideas. Empirical evidence includes recent Russian experiments during the 2007 solar eclipse (it may be the first confirmed astrophysical signature of solar electroscalar radiation). Moreover, most dramatically, public domain information will be introduced showing that a possible industrial-scale application of scalar wave technology might soon be put into place, making the coveted dream of wireless power a reality.
Quantum Information Storage In Water

Glen Rein, PhD

Quantum information as qbits has some exotic properties in addition to its current use in quantum computers. When quantum information is expressed in an aqueous environment, we must consider the quantum behavior of water itself. One such behavior is the ability of water to cluster around an electrically charged particle (ions, minerals and nutrients dissolved in the water). Semi-stable configurations exist for tetrahedral, pentagonal and hexagonal clusters, as demonstrated by NMR spectroscopy. These structures are held together by intermolecular hydrogen bonds exhibiting certain types of quantum behavior like quantum tunneling, quantum nuclear effects, quantum coherence and zero-point motion. Quantum domains in water which can store quantum information have been proposed. This theory describes the effects of longitudinal and scalar waves on water.

Original experimental data presented compare different methods of generating longitudinal waves to influence the electrical conductivity of water. These results support the new emerging field of informational pharmacology using water as a carrier of quantum information.

Quantum Tunneling in Electric Circuits

William Alek BSEE

Quantum Tunneling is described as a quantum mechanical phenomenon where electron flow is “tunneling through a barrier,” which classically it could not surmount. A simpler and more accurately interpreted version of “tunneling through a barrier” is an electron current flow acted upon by a negative work function or a torsion field. The source of this negative work function or torsion field is the Dirac Sea of Negative Energy.

An electron is described as a dynamo with angular momentum or spin. This spin has a mass-energy relationship which can have positive energy and positive mass, or negative energy and negative mass. To produce the negative energy and negative mass of an electron requires a force or torque (torsion) applied at right angles to the spin of the same electron. This causes the angular momentum of the electron to “curl” into the Dirac Sea of Negative Energy, and thus, the angular momentum becomes a COMPLEX number. As torsion increases, the REAL portion of the spin vanishes leaving a dominant IMAGINARY angular momentum, which is negative energy when calculated. By definition, this is the Torsion Field Effect which can be transformed into a current!

Vendor Showcase

Not all of the new and exciting technologies make it on stage. Often, some of the best technologies are in the expo area. As a feature, we allow the vendors an opportunity to give a 5-10 minute presentation on the products that they brought to the conference. This activity is restricted to the vendors who are not speaking at the conference.

CONCURRENT CONFERENCE

COFE10

Friday-Saturday
Aug 10 — Aug 11

COFE traditionally fulfills the mission statement of Integrity Research Institute to “research scientific integrity in the areas of energy, propulsion, and bioenergetics” so original papers on those vital topics are invited.

The COFE10 speaker schedule will be posted at the conference, A written proceedings of the conference will be available for purchase. DVDs will be available at the site.

Attendees of the TeslaTech Conference can attend the COFE10 lectures FREE.

Current science has no theory for the structure of the nucleus of an atom. The belief is that the nucleus is composed of protons and neutrons but they aren’t organized in any manner... the chaotic blob model of the atom. Conversely, the Structured Atom Model (SAM) states the nucleus is highly structured and stable. The nucleons (protons and neutrons) that make up the nucleus are organized in a highly predictable and stable structure. This structure is responsible for shape/layout of the periodic table.

In 2006 Edo Kaal set out to define a new atomic model. He started playing with marbles and observed the structures they made. By taping and gluing them together he created cylinders, spheres, cubes, etc. Imagining a central drawing force pulling the marbles to a common center, he came to the realization that in order to be stable the marbles had to be densely packed.

SAM will change our understanding of chemistry and physics. It gives us the ability to explain things we couldn’t before. One of the most exciting aspects is it explains how the elements are created. Prevailing science believes the elements are created in high energy events such as a supernova. SAM is a structural theory, it does not require a degree in advanced mathematics to understand.

Through the contribution of over 60 innovative thinkers, scientists, and artists a compelling tapestry that threads leading edge science with ancient wisdom is unveiled. Within this weave you will see all branches of science and wisdom of sages leading to an understanding of the elemental forces behind creation: water, fire, air, earth/liquids, plasma, gas, solids. Further examination reveals the Weaver’s golden thread and its formula that flowers Life from atoms to galaxies — micro to macro, space to earth.

The “law of triangle” in its many forms from magnetic currents, the structure of elements, platonic solids and fractals, to the distribution of particles will be illustrated. Though the lens of the telescope, microscope and Cymascope we will see rarely seen images of water, atoms and sound. Via a super computer you will see points of light and how life is formulated from a harmonic grid. Also you also explore the notion of evolution through harmonics and vibration. This takes us down the rabbit hole to our cosmic connection and our holographic universe.

By unraveling these mysteries, you will appreciate that we all come from the same Weave, the same Force. This is the common thread that ties us together in the endless extraordinary diversity of the Creator’s Web.

If you could distill down infinity, you would certainly get an Oil. This is alchemical law. But, more than that, this is the alchemical practice. It is possible to render the impossible tangible through the understanding of nature and alchemical theory. And, it is alchemy alone that holds the ability to extract an oil from a metal. Oils were understood to be the physical manifestation of a materials essential source. The soul or consciousness of the material in question - the life-giving force woven from the creator of all. By capturing souls and spirits and saving them away in flasks and vials, alchemists of the past carved out a way by which a man could live forever.

It might sound hypothetical, phenomenal, or downright absurd. But, in all honesty, there is no mystery here. Alchemy is the most documented science, art, and philosophy of our shared past. It is the soil from which all spiritual paths and medicinal practices grow. By exploring an ancient science through our modern lens, metallic alchemy has risen once again to coax humanity to higher potentials. Come learn from a practicing alchemist how Metallic alchemy works, how Metallic Oils are extracted, and applied for growth, healing, and technological advance.

Particle Mechanics
Theory of Energy States

Dannell Roberts

This book may contain the unifying theory of physics. What is the Unifying Theory? It is an idea that will show the relationship between all energies and matter. That’s exactly what this book does, starting by classifying the basic characteristics of energy and matter.

Building on these ideas, new models of the elements are introduced. We will show new ways of chemical bonding with new molecules introduced. These ideas leads to heat and cold causes. Gravity is introduced as a completely new concept. Gravity is far easier to understand than you can imagine. This theory will introduce new concepts of sound, light, electricity and magnetism. All of this is tied together to give you a picture of how the universe really works. The simplicity of this theory will amaze you. (372pp)

Water: The Key to New Energy
Cavitating Electrolyzers & Zero-Point Energy
by Moray B. King

Cars and generators, that seem to run on water? Sounds impossible! Yet inventors some times stumble across huge energetic phenomena, which they unwittingly attribute to hydrogen as they explore water electrolyzers, Brown's gas, HHO and hydroxy. This book culminates ten years of research and discloses a surprising new explanation... In an engine’s combustion chamber water nanobubbles or fog particles convert to microscopic ball lightning when subjected to a wide plasma abrupt electric discharge. For a few milliseconds thousands of tiny plasmoïds manifest a huge anomalous force on the piston. The plasmoïds self-accelerate due to their coherence with the quantum vacuum’s zero point energy. The behavior mimics a thunderclap. Herein offers a path for inventors: Just create the conditions of a thundercloud in an engine’s combustion chambers!.
