

## The H2G Black Box WILL Change The World!!!

Walt Jenkins

Research into lightning storms and how water molecules behave in charged fields led H2G to discover a new process of clean energy that can benefit the world. This new H2G technology has nothing to do with inefficient electrolysis devices, widely hyped on the internet. It does *not* extract hydrogen or oxygen from water, or use high, 20-80 amps, of power just to gain a few miles from a gallon of gas. The H2G water to fuel process has nothing in common with centuries old electrolysis. The new H2G process uses less than 180 milliamps of input power. It runs an engine 97% on water and will soon offer 100% clean water-fuel.

The H2G black box technology extracts energy from water. It works on a molecular level, similar to lightning exploding inside thunder clouds. It is so efficient, it can use a small 9 volt radio battery to convert water into a clean burning fuel. This breakthrough technology developed at H2G, offers the least expensive and cleanest source of energy on the planet. It converts water to fuel in real time, on demand, as needed. Here today!... it can provide clean fuel for any engine that currently uses hydrocarbon based fuels.

## Ball Lightning... Low Energy Nuclear Reaction

Dr Kiril Chukanov

Ball lightning is a quantum object that possesses unusual properties which can be used in free energy generation, electronics, communications, propulsion, military, biology. Ball lightning is a *giant macro-atom* composed by 2-D positively charged nucleus and electron shell/cloud around it. Ball lightning possesses three basic quantum properties: constant quantum temperature of its nucleus, nucleus - black hole (no space beneath its closed 2-D surface), quantum electrons forming 2-D shells around its nucleus. All of these unusual quantum properties can be used in practice. The science of ball lightning and technologies based on its quantum properties will change our universal paradigm and impact our everyday life.

Some scientists interested in this unusual natural phenomenon consider ball lightning as stable plasma formation – plasmoid – which obey all known physical laws. However, ball lightning is not a plasma formation! It is a quantum object... one, unique, without internal 3-D composition and structure, obeying only quantum limitations, ignoring/violating in some special conditions some universal physical laws!

## Water Vortex Key to New Energy

Moray Kling

Overview of years of research regarding energy anomalies from abrupt electrical discharges in water, mist and fog suggest surprisingly easy technology for new energy: Mimic a thunderclap in the cylinder of an internal combustion engine. The plasma from the electrical discharge surrounds each microscopic water droplet, which pinches from electrostriction into a torus to guide the plasma into a vortex ring or “plasmoid.” Ken Shoulders’ lifetime research demonstrated en-

ergy anomalies from such forms which include propulsive self-acceleration like an Alcubierre warp drive. An abrupt capacitive discharge through a wide plasma spark plug yields thousands of these entities per down stroke, which manifests a huge excess force on the piston.

HHO researchers unwittingly created these microscopic forms in electrolyzers as nanobubbles, which are surprisingly stable. Nanobubbles form on electrolysis plates, but typically grow into unstable microbubbles, which burst to yield molecular hydrogen. However, if the electrode surface is conditioned to form microchannels during a gradual buildup of residue (salt or electrolyte), nanobubbles of hydrogen detach before they grow too large. Stable nanobubbles are the important component of the gas, for they are the basis for abundant micro plasmoid formation.
