

Vibrational Healing

Using BioPhotonic Modulation

Joe Blanton

Every complex cell in an animal's body contains cellular power plants called the mitochondrion. These mitochondria are responsible for energy release directly related to injury repair and pain relief. When a cell is damaged, the mitochondrion, curls up like a hedgehog, and cell to cell communications is drastically reduced, or even ceased. As a result, there is excess bleeding, swelling

and possible infection. Cells exposed to the RED NaturaLaser Light causes the mitochondrion to spring into action almost immediately bringing cell to cell communication in the area of concern, and cellular repair begins immediately.

These results support the new field of informational medicine using quantum frequency carrier information of coherence on a cellular level. Vibranz RED NaturaLaser is a cold-laser with human bluePrint frequencies infused into the light to bring the body into balance and energetic homeostasis. Independent testing by Dr Kune using a GDV biophotonic camera, will be shown as well as Blood Microscopy, and Thermography. A few volunteers for neurological demonstrations of the brain's ability to communicate under stress in the presence of the Vibranz technology will be needed!

Relax Far Infrared Ray Technology

Health Technology for the Home!

Phillip Wilson

There have been hundreds of published studies on far infrared energy since the 1960's. The 2001 book, *Detoxify Or Die*, by Dr. Sherry Rogers extolled the value of far infrared saunas as being the last resort to rescue many of her very ill patients from death's door. By 2004, the Relax Sauna company started their research on their proprietary emitters of far infrared energy leading to the development of the Relax Radiator.

The Relax Sauna Generator is the culmination of 10 years worth of research leading Dr Chang and his team of scientists to the discovery of "how to take electricity and filter out the energies that did not resonate with and pulsate the water molecules of the human body", by using semi-conductor chips in a special arrangement.

The Relax Sauna Energy is one of the most extraordinary inventions of the 20th century! It is a natural solution to many environmental illnesses and those that result from chemical sensitivity. As an adjunct to meditation, physical conditioning, and the continued purification of those who are health food enthusiasts, the relax sauna has proven its value time and again. The relax energy is very helpful in increasing micro-circulation as well as reducing inflammation and pain.

Brown's Gas Practical Applications

Energy, Health & Agriculture!

George Wiseman

Brown's Gas was first patented by the late William Rhodes in the early 1960s, promoted globally by the late Yull Brown from the 1970s and researched by George Wiseman since the late 1980s. Known by many trade names... HydrOxy, HHO and (inappropriately) Oxyhydrogen, Brown's Gas is 'made' by electrolysis of water in electrolyzers that are specifically designed to NOT separate the resulting gasses.

Exceptional efficiencies are gained by maximizing production of Brown's Gas unique constituents, mainly Electrically Expanded Water (ExW)... a negative plasma phase of water. Traditional electrolyzers contains membranes (to separate the hydrogen and oxygen) that interfere with the mechanism that makes the ExW.

This presentation dispels the myths and presents scientific evidence that Brown's Gas is a mixture of 6 constituents, three expected and three unexpected. Unique characteristics of the unexpected constituents and applications to benefit mankind will be examined. Browns Gas can decrease carbon-based fuel consumption by 25%. It is a low cost, superior replacement for torch fuel-gases. In agriculture, its use can triple crop production. Finally, it has helped bodies heal from virtually all ailments... and may increase healthy lifespans!
