

Excess Heat with a Hydrogen Tube

Thorsten Ludwig

Recently a new hydrogen based device has attracted attention and has been replicated by Frolov in St Petersburg and J.L. Naudin in Paris. The device goes back on research of Irving Langmuir, who studied heat transfer from tungsten wires back in the 1920's. Langmuir, who received the Nobel prizes, discovered an energy anomaly in hydrogen at pressures lower than 0.1 atm, when in contact with high temperature tungsten wire.

Nicholas Moller who recently founded the Global Institute For New Energy Technologies (www.gifnet.org) developed the MAHG (Moller atomic hydrogen generator)- energy device on the bases of Langmuir's findings. Thorsten has recently inspected the device as well as UN secretary Cofi Annan, who visited GIFNET in April 2005 and recommended the development of this technology.

The device is quite simple and shows an overunity of 2, some report overunity as high as 21. Thorsten will present some physical explanations on why this is possible and why it is not violating the laws of physics! This is a highly inspiring simple device that everyone can build. GIFNET is not patenting the device but is taking the public domain approach to spread this technology as wide as possible. The full construction details can be taken for free from their website.

Aqua Jewel The Crown Jewel of Water Conditioning

Ralph Suddath

Pouring more and more chemicals into our water in an effort to clean our water is no longer a solution to pollution. There is an easy way to solve the problem of our water becoming polluted and de-energized which costs only a fraction of what traditional water treatment methods cost. By raising the vibrational frequency of water, unhealthy bacteria are no longer drawn to it. For example, I have observed that mosquitos only lay their eggs and be drawn to water that is stagnant and de-energized vs. water that is fresh and clean.

What is needed is a paradigm shift in how we perceive and care for this precious resource, which is the foundation of all of our lives. Ideally water's vibration needs to be raised naturally, as it is in nature where life-supporting frequencies can be placed into the water. Perhaps

The unique properties of Browns Gas, still not fully understood, are begging for the experimenter to unravel its mysteries. These mysteries revolve around the fact that Browns Gas *was* water, *is* water and *will be* water... and WATER is where the real mystery lies! H₂O, HOH, Hydrogen Dioxide, Adam's ale, Elixir of Life, universal solvent, call it what you want, it is necessary and fundamental to Life.

Dr John N Hait's Resonant Field Theory (RFT) can explain the nature of water, including the imprint ability of water and why Browns Gas can do what it does. This fundamental mechanism of physics is sound, reasonable, logical, and calculable. Resonance fosters stability. Resonance maintains information. Photons

the best we can do is to mimic this natural process. By implementing technologies that have electromagnetic influences on water, it is possible not only to erase information from harmful substances, but also to induce positive frequencies into the water.

The *Aqua Jewel* is based on emerging technologies embracing these basic principles. AquaJewel technology may soon be used in place of our current chemical water treatment methods. Aqua Jewel is my device (patent pending) for treating fluids and a method for same. This water treatment system utilizes vortex action and frequency transmissions to reduce bacteria, algae, and fungus in the fluid without the use of chemicals.

Browns Gas... Fire from Water

Larry Oja

resonate. Electrons resonate. Hydrogen resonates. Water resonates. Browns Gas resonates. You resonate. And you will resonate with this presentation!!

This presentation explores the subtle nature of water and Browns Gas, with examples of health applications, energy applications, machines and available kits. All attendees are invited to become inventors and researchers of Browns Gas phenomena. Be part of the excitement of the future in alternative energy and alternative health. Build or buy your own Browns Gas machine. See and feel what Browns Gas can do for you. After 40 years, the Browns Gas technology is at a point that you will want and need to be involved in this research. The Earth, climate, people are changing, literally all things are changing. Don't be the last to find out. Dare to make a difference!
