

Water Electrolyzers & Zero-Point Energy

Moray King

Water electrolyzer projects are very popular on the web where most investigators believe they produce a mixture of hydrogen and oxygen (aka HHO, hydroxy, or Brown's gas). The burning gas exhibits energetic anomalies like a cool flame, yet it can vaporize tungsten. There are claims of element transmutation and radioactivity remediation using the gas. Burning hydrogen can't account for the anomalies. It may be that hydrogen is not the energetic component of the gas, but rather charged water gas clusters which activate and coherently trap zero-point energy. The anomalies are similar to those manifested by plasma charge clusters, a form of microscopic ball lightning discovered by Ken Shoulders.

Recently, Ohmasa discovered that mechanically vibrating plates greatly improves gas production. Some researchers recycle the exhaust water back to the electrolyzer. Energetic water clusters present after discharge in the engine could continuously augment the water's energy content by recycling them back to the electrolyzer. The energetic clusters appear similar to Rydberg matter. Recent announcements include the close-loop, self-running system by Steven Eaton of HybridTech corporation. He claimed to have run a 3.55 KW generator on 100% water that completely powered his electrolyzer at 12.5V, 15A, producing 5 liters of gas per minute with excess electricity available to power some light bulbs.

Its Time Has Come... The GEET Solution

Paul Pantone

Try to imagine owning the ultimate home production power plant; it heats your water, generates electricity, takes care of heating and air conditioning, by utilizing the waste heat from refrigeration and applying it to storage/hot water, while the generator produces all the electricity you want. This is all possible with the GEET Fuel Processor.

In simple definition, it could be called a new type of carburetor with a miniature refinery built in. With it, there is no need for catalytic converters, smog pumps and many other costly items on cars, as the GEET Fuel Processor is not just a fuel delivery system it is also a pollution elimination unit! Your mileage will be increased if you are consuming ALL available energy, from whatever fuel you may be using.

Paul Pantone, the inventor, was held illegally in Utah's 'Guantanamo of the West' because he refuses to hand over his patents. Despite this flagrant attempt at suppression and intellectual theft, Paul is carrying on with his work.

In addition to covering the basics of the technology, Paul will unveil some of the advances he has made in the past year. Finally, he will provide us with details of the latest initiatives taken to promote the international GEET network... and a new research center!

OverUnity via the Starship Coil

Richard F. Motzer

need was to have a low voltage/high current source to operate two of HHO cells that was developed, from a standard automotive electrical 12-volt system. In his attempts over the last one and half years, he was able to meet his goal but also noticed something very unusual.

Think of the circuit as one wire across the source which is supplying a current of 5 amps. Yet inside this wire the current shows to be 15 amps plus some powerful - destructive properties. Others have duplicated this circuit with success. Richard then realized that this circuit can be applied in different areas of the alternative energy field.

Since then he has developed a low cost way to fast wind a "Rodin" coil, it's called the *Starship Coil*. It takes 1/10 the time to wind and is much stronger than the "Classic Rodin Coil"

About 2008, Richard started his research in the HHO field using David Lawton's make over of Stanley Meyer's circuits. He has since developed his own circuit **which shows over unity by as much as 1700%**. The problem has always been how to extract the extra power developed. Richard has had some recent success in doing that.

This electronic circuit follows loosely the design of David Lawton's circuit trying to duplicate the Stan Meyer's original HHO cell operation. Richard's
