

2026 ExtraOrdinary Technology Conference

Albuquerque, NM --§-- Aug 12 - 16

MEET THE SPEAKERS!

- Hakasays
- Nathan Buntin
- Uri Lee
- Joe Blanton
- Micha Eizen
- John E Brandenburg PhD
- Lucian M Ionescu PhD
- Thomas Bailey PhD
- Sean Logan
- Parker Edmondson
- Jeff Hayes
- Phil Wilson
- Paul Harris
- Ryan Thompson
- Weiping Yu PhD
- David Martin
- Terrence Howard
- Dorian Demetrulias
- Vernon Roth
- George Wiseman
- Dr Thorsten Ludwig
- Moray King
- Robert Greenyer
- Karen Elkins
- Dr. Paul Finman
- William Armand Sosa
- Gabrielle Ensign
- Lynne Wainfan PhD
- Suzanne Price
- Bernard Konkin

Great Conference Site!!!
Crowne Plaza Albuquerque

ExtraOrdinary Topics Featured...
 Tesla Technology • Magnetic Motors • Zero-Point Energy
 Energy Savers • Cosmic/Radiant Energy • Brown's Gas
 Low Temperature Plasma • GEET • ElectroGravitation
 ElectroMedicine • Magnetic Healing

*Get UP CLOSE... & Personal
 with Working Hardware!
 & Meet Real People!*

For more info:

(520) 463-1994

DVDs of Past Conferences Available!

Theory & Construction!

Information so
**HOT... it NEEDS
 to be Suppressed!**

The present is theirs; the future, for which
 I really worked, is mine. – Nikola Tesla

TeslaTech.info

www.teslatech.info ... Energy • Medicine • Technology For the Future 🙌

2026 ExtraOrdinary Technology Conference

Crowne Plaza • Albuquerque, NM • August 12- 16, 2026

TeslaTech, LLC reserves the right to make changes to this schedule without notice.

Wednesday • Aug 12

Session 1 (Evening) • ExtraOrdinary Tesla Coil Technology

5:00PM: **Hakasays** - *Build a Better Tesla Coil*

6:00PM: **Nathan Bunten** - *Rediscovering Resonance*

8:30PM: **Conference Evening Social**

Thursday • Aug 13

Session 2 (Morning) • ExtraOrdinary Health Technology

8:00AM: **Uri Lee** - *DNA Renewal: Reversing Time...*

9:30AM: **Joe Blanton** - *Witness Red IR Laser Age Reversal*

11:00AM: **Micha Eizen** - *Tesla Scalar Healing Technology*

Session 3 (Afternoon) • ExtraOrdinary Gravity & Materials Technology

1:00PM: **John E Brandenburg PhD** - *Gravity Modification Based on the GEM Effect*

2:30PM: **Lucian M Ionescu PhD** - *Grebennikov and 2D-Metamaterials*

4:00PM: **Thomas Bailey PhD** - *AI Conflicts with the 5-Step Scientific Method*

Session 4 (Evening)

6:00PM: **Sean Logan** - *The Nature of Orgone Energy*

7:00PM: **Parker Edmondson** - *Tesla's Wireless Energy Transmission*

8:30PM: **Conference Evening Social**

Friday • Aug 14

Session 5 (Morning) • ExtraOrdinary ElectroTherapy Technology

8:00AM: **Jeff Hayes** - *Tesla's Health Giver... His Most Advanced ElectroTherapy*

9:30AM: **Phil Wilson** - *Far Infrared Health Keys*

11:00AM: **Paul Harris** - *Engaging the Universal Clutch on the Wheel Work of Nature*

Session 6 (Afternoon) • ExtraOrdinary Energy Technology

1:00PM: **Vendors - Vendor Showcase**

2:30PM: **Ryan Thompson** - *The Bedini System... E-Field vs B-Field*

4:00PM: **Weiping Yu PhD** - *Unlocking the Mystery of the Universe*

Session 7 (Evening)

6:00PM: **David Martin** - *When We Shift The Perspective Fulcrum*

7:00PM: **Terrence Howard** - *The Lynchpin... The Harmonic Model*

8:30PM: **Conference Evening Social**

Saturday • Aug 15

Session 8 (Morning) • Plasma, Hydrogen.... & More!

8:00AM: **Dorian Demetrulias** - *Practical Plasma Reformation*

9:30AM: **Vernon Roth** - *Emerging Energy Sciences and Remote Viewing*

11:00AM: **George Wiseman** - *Energy is Medicine - Hydrogen..The Missing Link*

Session 9 (Afternoon) • ExtraOrdinary Energy Concepts

1:00PM: **Dr. Thorsten Ludwig** - *Magnetic Motor-Generator Measurements and ZPE*

2:30PM: **Moray King** - *Invent a ZPE Device from an Electrolyzer*

4:00PM: **Robert Greenyer** - *The Power and the Signature of the Monopole Clutch*

Session 10 (Evening)

7:00PM: **Karen Elkins, Dr. Paul Finman, William Armand Sosa**

The Mercury Red Thread, Ancient Technology and Fusion

8:30PM: **Conference Evening Social**

Sunday • Aug 16

Session 11 (Morning) • ExtraOrdinary Physics Concepts

8:00AM: **Gabrielle Ensign** - *Behind Every Sunflower... VBM, Sacred Geometry & Creation*

9:30AM: **Lynne Wainfan PhD** - *Introducing Conscious Systems Engineering*

11:00AM: **Suzanne Price** - *Tesla's Visionary Future and Conscious Evolution*

Pre Conference Workshop
Wednesday Afternoon
Aug 12 -- 1PM
Bernard Konkin
HYDROGEN Wkshp

DVDs Will Be Available After Conference!

Wednesday Workshop

Wednesday Aug 12 -1 PM

HYDROGEN The Blueprint of Creation

Bernard Konkin

Before stars... Before galaxies... Before the first pulse of creation... there was Hydrogen, It is the universe's original element: the simplest, the most abundant, and the most consequential. Two atoms of hydrogen bond with one of oxygen to form water — the very cradle of life. Add a neutron and it becomes heavy water. Add another and it becomes Tritium — nuclear fuel, the engine of the hydrogen bomb, and a reminder that the most elemental things carry the greatest power.

Hydrogen is not merely a building block. It is the blueprint. Every element in existence was forged from it — cooked in hearts of dying stars, scattered across the cosmos, and gathered again into worlds, into oceans, into us. At this conference, Bernard presents a bold exploration into hydrogen's role in the formation of elements, energy systems, and the deeper mechanics of light and matter.

August 12 • Tesla Technology

Wednesday Aug 12 -5PM

Build a Better Tesla Coil!

An engineering crash course into Tesla's coil construction techniques!

Hakasays

Most people think a 'Tesla Coil' requires two or three coils but many of the coils our group works with have only one. No primary. No secondary. Just a single Extra coil is often all that is needed to achieve great effects, often with little-to-no power. This is often overlooked in the community. We'll be touching on some of the differences between 'modern' Tesla Coils and the coils that Tesla actually built, and exploring why coils today look so different from what Tesla built over a century ago.

We'll cover *lessons-learned* tips and tricks from colleagues like Eric Dollard and Griffin Brock, for experimenters to improve their results. Some coils will be demonstrated on-stage and compared with conventional Tesla Coil setups most people build. Many will be quite simple and yet extremely efficient. Finally, results from our group's more recent experiments following Tesla's original research.

Conference Lodging Facilities

Limited space...
Please register by July 15!

Crowne Plaza Albuquerque

1901 University Boulevard NE
Albuquerque, NM 87102
(505) 884-2500

Be sure to request our special
2026 TeslaTech
ExtraOrdinary Technology
Conference rates!

\$129⁰⁰ per night!!*

* \$129 for 1/2 people

Hotel Reservations:
(844) 356-6178

Use Code: **TTC**

Special rate expires July 15!!!

Conference Evening Social

Meet the Speakers
... and New Friends!

Wed/Thu/Fri/Sat
~8:30PM

Every night provides an opportunity to meet the speakers and other attendees in a relaxed social setting. Its a great opportunity to make new friends that share your interests. We even provide some refreshments!

Hotel Amenities

Special hotel amenities for
conference attendees include:

- Free Breakfast
- Free high speed internet
- Clean, fresh, modern rooms
- Complimentary Self-Parking
- On-Site Fitness Center
- Free local calls
- Variety of restaurants

Conference Evening Sessions ...

Wednesday Aug 12-6PM Thursday Aug 13 -6PM

Rediscovering Resonance

Using a spinning ball of plasma called a resonant arc vortex

Nathan Buntun

Coupling fields in resonance is a way to understand how gravity is built from the ground up and changing the fundamental force into an emergent one. To produce this field we had to understand how nature already does this.

We live in a pressurised bubble of energy that has gradients naturally built into it. It is divided by the density and frequency. Coupling fields in resonance is creating layers of sheath zones that are emergent from a center where energy is compressed into balls and slowed down by the density of energy. This sets the time dilation of the coupling field.

Each resonance zone has its own natural color and has a gradient of that color in each zone. Going from light in color to bright in color based on the density of energy at each point. In order for the fields to self organize you must let them form into a sphere... nature's preferred geometry.

The Nature of Orgone Energy

Tesla's Wireless Energy Transmission

Sean Logan & Parker Edmondson

Inside a hollow charged conductor, the Electric Field is zero, but the Coulomb Potential is high. By varying the amount of charge on the conductor, you vary the Coulomb Potential in the space inside. This is what Tesla was doing at Colorado Springs. He had a hollow metal sphere on top of his secondary. His circuit rapidly varied the amount of charge on this sphere. A time-varying Electric Field induces a Magnetic Field. A time-varying Coulomb Potential induces Life Energy. The Coulomb Potential is the only scalar in classical electrodynamics. The Life Energy induced by a time varying Coulomb Potential is a true scalar wave.

Parker has an ambitious plan to build a magnifying transmitter on the scale of Tesla's Colorado Springs coil. The first step is to build a platform for the coil. However, unexpected delays from Home Depot impact the project timeline and a call for specific insulators is made. Construction has resumed...

Advanced Plasma Technology for Total Body Wellness

Inventor Paul Harris created Phitality to bring together the healing modalities of light and sound, utilizing various Tesla technologies including his resonant transformers circuit and single wire transmission to excite unique radiant energy plasma tubes. Phitality is designed to structure plasmoids within and surrounding the body. By generating coherent life-giving fields, Phitality restores the electrical vitality that underlies true wellness—helping your body remember its natural blueprint of balance, clarity, and renewal.

A New Era of Regeneration

Phitality
LEADER IN ELECTROTHERAPY SINCE 2004

www.Phitality.com

Friday Aug 14 -6PM
**When We Shift
the Perspective
Fulcrum ...
Everything Changes!**

David Martin

When we shift the perspective fulcrum — moving from a collapsed, 2-dimensional view in reality to a fully triadic one that honors source, substance, and contextual field simultaneously — everything changes. Old “impossible” anomalies become readable signatures of coherence. Depleted wells begin producing again. Solid rock yields tar beyond theoretical limits. Plasma systems reveal hidden organizing principles instead of contamination.

This 27-dimensional foundation doesn't add complexity; it removes the blind spots that have kept extraordinary technologies hidden in plain sight. Moving the fulcrum opens practical new pathways in field propulsion, energy harvesting, material synthesis, and healing technologies — not as theory, but as the natural result of seeing the world as it actually interacts with itself.

The field was always there. Are we willing to stand in a new place long enough to see it?

Friday Aug 14- 7PM
The Lynchpin
**... the Harmonic Model
for new Understanding
of the universe!!!**

Terrence Howard

What is the one underlying principle that all things must abide by in order to exist or be measurable within our reality? *The Lynchpin* marks that space....— a realization of unified field understanding. It plays a vital and fundamental role in the manifestation of our Universe. Join us as we explore the limitless nature of this most sacred geometry, and together, let's meet the future halfway.

For over a century, scientific models of the Universe have relied upon Euclidean and Cartesian frameworks combined with particle-based interpretations of matter and force. Yet persistent anomalies — from quantum entanglement and dark matter discrepancies to the limitations of energy extraction — suggest our foundational understanding may be incomplete. Terrence proposes a paradigm shift: a geometry of waves rather than points. A geometry that acknowledges curvature, symmetry, harmonic resonance, and the interconnected structure underlying reality...

Saturday Aug 15 - 7PM

**The Mercury
Red Thread**

**Ancient Technology
and Fusion**

**Karen Elkins
Dr. Paul Finman
William Armand Sosa**

From antiquity to modern times, this presentation traces mercury across ancient civilizations, revealing a deeper understanding of energy, physics, and advanced technology than conventional history has acknowledged. From the mercury-laden chambers of Teotihuacan to Chinese imperial tombs, from electrochemical artifacts to the enigmatic Dendera reliefs in Egypt, a pattern begins to emerge—one that echoes descriptions of mercury-based technologies found in ancient texts describing Vimanas. This thread extends forward into modern times through the experiments of Nikola Tesla with mercury, plasma, resonance, and wireless power — most notably his ability to illuminate fluorescent tubes without any direct electrical connection.

The Dendera Light, found within the Temple of Hathor, is among the most controversial images

in ancient Egypt. William's research explores whether these famous reliefs preserve knowledge of a real plasma-based technology. Through the construction and successful operation of working replicas, he investigates the electrical nature, physical design, and possible applications of these ancient devices, bringing together reconstruction, observation, and alternative theories surrounding lost technologies and our cosmos.

This presentation offers unique insights by bridging ancient symbolism with modern scientific principles, suggesting that energy may not simply be created, but tuned, resonated with, and transferred through fields and conductive mediums such as mercury. What if these fragments—ancient accounts, artifacts, symbolic imagery, and Tesla's work—are part of a continuous technological lineage? One humanity is only now beginning to recognize. This exploration opens the gateway to a new perspective on the ancient world!

DNA Renewal

Reversing Time Through Plants, Sleep & Dreams

Uri Lee

Advances in epigenetics and regenerative science are revealing that our DNA is not a fixed blueprint, but a dynamic system influenced by environment, lifestyle, and states of consciousness. Subconscious and ancestral imprints... encoded in DNA, epigenetic expression, and the biofield—contribute to aging, illness, and stagnation. Some of the most powerful processes of cellular repair occur during deep sleep... when the brain clears toxins, the nervous system resets, and the body activates

natural pathways of regeneration. Restorative sleep, dreams, and sacred plants may support the body's innate renewal processes. Dreaming is both a biological and psychological process that helps reorganize memory, release emotional stress, and restore cognitive balance. When combined with intentional practices and plant-based support, dreaming and healthy sleep patterns may become powerful keys for healing, creativity, and expanded consciousness.

Combining spiritual intent with healing frequency technologies aligned with Tesla's principles of energy, frequency, and vibration, results in pathways of anti-aging, expanded consciousness, and renewal being unlocked. Attendees will gain practical insights into improving sleep quality, enhancing dream awareness, supporting nervous system balance, and creating daily rituals that align biology, consciousness, and longevity.

Witness Age Reversal with the InfraRed Laser ReVitalazers

Joe Blanton

Vibranz programmed ReVitalazers can bring actual cellular repair in the moment on a new injury! Vibranz harnesses the power of sacred geometry and uses quantum field zero-point technology to add Human Blueprint Frequencies into each laser to create a symphony of frequencies which stimulate the Mitochondria in our cells to produce more ATP (about 30-35% more life-force energy) so that cells have the energy to do their work.

Dr. Doug Wallace claims ALL Aging and most illnesses are simply too many dysfunctional mitochondria that do not produce enough energy for their cells to work. New discoveries show there are free-floating mitochondria in our blood. I will show how the Red/InfraRed, Green, and Violet/Blue ReVitalazers all have a unique impact on the mitochondria to not only produce more ATP, but also cause healthier protein folding and further stimulate stem cell production.

GDV BioPhotonic camera science shows how ReVitalazers take about 30 seconds to add about 30-35% more life force energy. Dr. Jack Kruse says we need to "Optimize our Light, Water and Magnetism". The Red/InfraRed, Green and Violet/Blue lasers replicate sunshine to our bodies with every photon in the laser beam energetically giving up an electron into our body's water/blood just as sunshine charges the water in our system!

Tesla Scalar Healing Technology

Design & Concept Based on Tesla's Research...

Micha Eizen

What if your intention could be amplified... and reach anywhere? Nearly a century ago, pioneers like Thomas Galen Hieronymus demonstrated that a simple photo and a focused intent could influence crops miles away—eliminating disease without physical contact. Tesla's Scalar Healing Machine takes that idea further.

This device is designed to amplify intention—up to 30 times—while removing the complexity typically required in radionics. The machine can either

treat a local user that holds two copper rods, connected to the machine... or it can do remote healing to a specific target (individual/ object/ area/ crop field). Furthermore, this machine has a skin treatment feature, which can accelerate wound/surgery healing, remove wrinkles, by using the Iontophoresis phenomenon, by conducting very low current through the skin.

Professor Haralick used this device to research the hypothesis that the conscious intention of the experimenter can imprint water and crystals. His well documented results on the ability to change the electromagnetic characteristic properties of water with his intent was presented in prior TeslaTech conferences.

In this presentation, you won't just hear about Tesla's Scalar Device—you'll see its components, understand it, and learn how to use it!

Gravity Modification

based on the GEM Effect

John E Brandenburg PhD

Experimental evidence of possible gravity modification based on a “Plasma Universe Theory” is introduced using the GEM Effect. Two unified field theories following the Einstein concept, and consistent with the “Plasma Universe” picture of a unified gravito-electrodynamic universe, have proposed that the two long ranges forces of nature, Gravitation and Electro-Magnetism (EM), can be unified separately from the short range nuclear forces. Both theories are based upon the connection of Gravitation to the Poynting vector of EM and suggest that gravity modification by EM fields may be possible.

The basic theories are summarized as an introduction to the derivation of the Vacuum Bernoulli Equation which makes quantitative predictions of the degree of gravity modification. Such effects may have been observed in the laboratory and a new experiment confirms these results and is described in detail, along with its results. The experiment, using a 170g coil from a miniature electric race car motor energized with Tesla 3-Phase power at frequencies in the range of 400Hz, hung by nylon filaments from a load cell, to avoid EM interference, apparently experienced changes in gravity force corresponding to a loss of approximately 0.15 grams when energized and relaxed back to normal weight when power was terminated. Null tests confirmed that no EM interference with weight measurement occurred.

Grebennikov & MetaMaterials

Are we ready to manufacture HG Wells' favorite?

Lucian M Ionescu PhD

Nature, as always, is an available tutor... one that Viktor Grebennikov listened to when he claimed to have invented a levitation platform which operated by attaching dead insect body parts to the underside. Grebennikov wrote detailed accounts of his experiences flying over the Russian countryside using his levitation device. He asserted that he invented a levitation platform that operated by utilizing the cavity structure effect found in insect body parts, which he believed produced a form of anti-gravity.

This demands a look at some insect wing geometric structures, with a 2D-Moire materials approach and crystallography theory in mind. Remembering quark structure is important, we'll get some hints of what may be going on from Walsh's Average Quark Model and orbitals theory in Chemistry of 2D-materials. Engineers designed and manufactured super-strength materials like graphene and beyond, with “super-power properties”. When stacked as a multi-layer wafer into a Moire superlattice, they acquire superconducting and weird EM properties, technology reminiscent of UFO “skin”.

Finally, the Quantum computing revolution has advanced to whole new level of technology achieving the control of nuclear spin one at a time; quantum tunneling at macroscopical dimensions (mini warp-jumps in Josephson junctions: Nobel Prize 2025); and developing super-metamaterials!

AI Conflicts with the 5-Step Scientific Method

SCIENCE requires objective evidence, reproducibility, and logic... **AI does NOT!**

Thomas Bailey PhD

AI and the Scientific Method by definition will often be in direct irresolvable conflict! The nature of AI is to collect as much information on a topic as possible without regards as to its accuracy or veracity. Its algorithms tend to disregard, even discard, radical approaches in favor of established tradition. Such has become evident regarding the understanding of *nanocarbons* as discovered 40 years ago at Rice University where a false geodesic dome model of structure and bonding was

proposed with the subsequent backing of the 1996 Nobel Prize regarding fullerenes. For the last 3 centuries chemistry was taught with pop concepts like double or triple bonds introduced of value only for Euclidean systems. In the course of study and comparisons of the different carbon allotropes, it was learned that basic understanding of bonding concepts in chemistry have been faulty regardless of the numerous Nobel Prize winners involved.

Evolving work over the last 4 years, proves that only a revolutionary new NonEuclidean concept of bonding involving curvature and electron delocalization can explain NonEuclidean nanocarbons and their properties. Working exclusively with only carbon and studying its different allotropes, a “Composition of Matter” patent of the new super allotrope of crossene was awarded to be added to the diamond, graphite/graphene and fullerene allotropes providing a new concept of bonding!

Tesla's Health Giver

Famous Electrician Proposes to Drive Out All Bodily Ailments

Jeffery Hayes

The headline of the January 18, 1896 edition of the *Detroit Free Press*, introduced and defined what Nikola Tesla described as one of his most advanced applications of energy for human benefit... Low Frequency PLSF (Pulsed Longitudinal Scalar Fields). Declared at the time as Tesla's "Health Giver" it remains to date his most advanced healing modality. This innovation marked significant evolution beyond his earlier devices allowing an intimate immersion into the healing circuit.

Obsoleting his previous efforts with improved safety and effectiveness... most notably through the elimination of the radio frequency (RF) carrier... Tesla's approach enabled a low frequency, high-potential system to be capable of producing whole body biphasic effects that were previously unattainable within earlier RF driven MWO designs.

Tesla's electrotherapy science has long been suppressed. However, a modern revolution has been occurring with electrotherapy making an amazing recovery after almost complete elimination by the medical cartel. Currently electrotherapy is adopted in many applications by conventional medicine. Today, this legacy is being reimagined. TeslaGo systems embody Tesla's original vision: elegant, portable, high potential oscillators designed for modern application. TeslaGo is the next expression of Tesla's enduring pursuit of energy, frequency, and vibration in service of life.

Far Infrared Health Keys

Research Leads to Natural Healing Saunas!

Phil Wilson

Heat for purification, for healing, and for achieving optimum health is an ancient tradition. Sweat lodges, Roman spas, and Nordic saunas relied on fire to provide heat. Natural hot springs located around the world were provided heat from magma within the earth... some of the most famous being in Japan. The healing invisible yet powerful heat source was identified as far infrared (FIR). Led by NASA, researchers developed far infrared panels for deep space applications, designed to stimulate circulation and promote tissue

repair in astronauts facing muscle atrophy in zero gravity. This discovery laid the foundation for far infrared saunas, therapeutic devices, and medical applications worldwide.

Since then, the goal was to transform electricity into a precise, therapeutic FIR frequency that could mimic this healing environment—a challenge that took over a decade to perfect. Now semi-conductor chips filter out the near and mid infrared energies to generate a pure far infrared energy between 4-14 microns. Only this energy resonates with our water molecules and organic cells. You can touch the heater units directly with tissue paper... and it will not burn!

An infrared sauna sends infrared energy into the body which penetrates instantly. The Relax far infrared sauna increases core temperature, and provides *immediate pain relief!*

Engaging the Universal Clutch on Wheelwork of Nature

Paul Harris

Paul provides a pathway to perfect health and limitless sustainable energy, Future energy and health technologies using *plasma* to combine light and sound frequencies with both electro-magnetic and magneto-dielectric fields to achieve unlimited energy and holistic wellness.

Considered by many as a "MedBed" type device, Theraphi utilizes Tesla technology to envelop the body in a coherent electrostatic field of Plasmoids both within and surrounding the body using the Theraphi... which is recognized as the most advanced Plasma Wave therapy device. Phi-ratio-

harmonic-cascade-induced longitudinal plasma waves and their resultant superluminal phase-conjugate (time-reversed) negative entropy, is the key to well being and healing. A related device, the Quantaphi is designed to be used as a room conditioner for sacred space, meditation and as a hifi sound system which conditions the space for audio clarity. Many aspects of EMF protection is achieved. The Quantaphi uses plasma technology to create a radiant field and allows you to fill that field with what ever sound you like.

Paul's comprehensive understanding of how energy fields affect biological systems led to the development of these plasma-based technologies. Find out how plasma, plasmoids, ball lightning and exotic vacuum objects lead to coherent energy transformations which validates the philosophers of old with new understanding of the nature of matter, electricity, magnetism, gravity, space and time.

Bedini System E-Field vs B-Field How the E-Field adds extra energy into The Bedini System!

Ryan Thompson

The Bedini System exploits the tension between the E-Field and B-Field. The E-Field is like throwing a stone in a resting body of water while the B-Field is an effect of the E-Field influencing the body of water... like ever expanding rings from where the stone hits the water. The Bedini System can obtain extra energy from the E-Field being converted to the B-Field in the coils or inductors. The extra energy from inductive collapse of the main coils or inductors causes a vacuum in the E-Field layer or free space. This collapse spaced around the coils or inductors, gives us the extra energy that can be harvested and pushed into the batteries.

The main take away from this is an efficient high to low potential... or to put it this way, the Bedini System disturbed the E-Field or vacuum of free space and though this disturbance created or absorbed the extra energy that is in free space or said vacuum. Then this extra energy is converted to B-Field energy that gets transferred to the battery. Also don't forget the energy that is also collected from the collapsing fields in the inductors or coils, that is from the oscillation that are created from the passing of the magnets.

Demonstrations of the Bedini System show a simple way to convert the negative energy or radiant energy to positive energy for conventional electronics to use, in our case charge batteries.

The Magnetic Universe A New Foundation For Physics

Dr Weiping Yu

For over a century, physics has been entangled in a web of misconceptions, rooted in the mischaracterization of the electron as a negatively charged elementary particle. This foundational error gave rise to Quantum Mechanics and the Standard Model—frameworks that obscure rather than illuminate the true nature of reality. Exposing the flaws in modern particle physics, the author reveals a simpler, deterministic architecture underlying the cosmos—a unified structure defined by one foundational particle, one force, one field, one principle, and one universe... the Uon Theory of Everything. This theory argues that electrons and protons do not fundamentally exist. These are emergent phenomena—constructs arising from deeper, unified interactions governed by Uons.

This breakthrough not only redefines matter and energy but also opens the door to transformative advances in science and technology. Dr. Yu's bold theoretical framework offers a coherent bridge between Einstein's Theory of Relativity and Quantum Mechanics. His work introduces transformative concepts regarding the nature of mass, charge, and magnetism, and sheds light on elusive phenomena such as dark matter and dark energy. His models challenge conventional interpretations of black holes, the Big Bang, and atomic structure, offering testable, intuitive alternatives that reimagine the universe's most basic building blocks.

Vendor Showcase

Not all of the new and exciting technologies make it on stage. Often, some of the best technologies are in the expo area. As a feature, we allow the vendors an opportunity to give a 5-10 minute presentation on the products that they brought to the conference. This activity is restricted to the vendors who are not speaking at the conference.

Practical --- Plasma --- Reformation

Plasma: 4th state of matter

Dorian Demetrulias

Plasma, the fourth state of matter, is a field whose boundaries are being expanded by studies made possible by the GEET engine technology invented by Paul Pantone. GEET is based on a self-generated low temperature plasma field. Using GEET devices, Paul discovered 181 new phenomena. Dorian, who studied under Paul, has carried the research forward and built a GEET Bike! To gain a better understanding of LENR phenomena, he reverse engineered Malcolm Bendall's design.

All of this hands on research led to Dorian's hexemeter hydrogen reactor... an engine modification device like a turbo that uses exhaust heat to reform steam with plasma into a supplemental hydrogen fuel that drastically reduces fuel consumption, enables the engine to use alternative fuels and converts carbon into oxygen in the combustion chamber with low energy nuclear reactions that are attributable to the oxygen rich exhaust. Prototype development efforts for his hexemeter design features computer controlled ignition and Aaron Murakami's spark system.

By sharing ideas on how to make hyperefficient, potentially overunity, reactor systems, Dorian hopes to spread awareness for funding his research and outfitting a laboratory for further research! One goal... to allow people to use these plasma engines like solar power and get paid to generate power!

Emerging Energy Sciences & Remote Viewing

Towards a Plasma Based Future...

Vernon Roth

Several radical technologies currently emerging are at the fringes of scientific inquiry and experimental engineering. Recent developments in hydrogen plasma systems, include high-energy plasma confinement, water-derived fuel systems, and the growing interest in plasma behavior as both an energetic medium and a potential carrier of anomalous electromagnetic effects. This presentation will explore the concepts of resonant energy stimulation and advanced energy harvesting techniques.

The second section explores magnetic-field manipulation and theories surrounding ZPE extraction as these are used in GEET based fuel systems. This includes experimental approaches to interact with the energetic structure of the vacuum itself. The magnetic theories of Edward Leedskalnin and his concept of "magnetic current" as a fundamental force distinct from conventional electrical theory has implications for resonance, material manipulation, and coherence, keys to extraordinary energy technologies.

The final section introduces Remote Viewing (RV) as a structured methodology for research and a counter point to emerging AI dependence. A brief tutorial demonstrates how RV protocols can be applied as a research tool to investigate emerging technologies, identify blind spots and material weaknesses, and create a pathway to move forward with paradigm shifting concepts!

Energy IS Medicine!

HYDROGEN...

**Missing Link bridging
energy, water, and
biological systems.**

George Wiseman

Hydrogen, one of the most fundamental elements in the body, plays a critical role in cellular function, resilience, and overall vitality. The latest AquaCure device, the AC60, is a great source of on-demand hydrogen for experiencing its practical benefits. The past year has culminated in the perfection of its new modification which will be demonstrated at the conference! Through live video, attendees will see the Micro-Bubbler in action—infusing water with ultra-fine gas bubbles that transform its behavior and interaction with living systems.

Deuterium, also known as "heavy hydrogen," is a form of hydrogen with one neutron and the usual proton, making it twice as heavy as regular hydrogen. While deuterium is naturally found in the environment, an excess of it in the body interferes with normal cellular function, particularly energy production in the mitochondria.

By drinking Deuterium-Depleted Water (DDW), consumers may experience a reduction in the negative effects of deuterium, leading to improved energy levels and metabolic function and potentially slowing the aging process. At the conference, George will demonstrate a working apparatus for producing DDW (also referred to as *new water*) using the AC60. This demonstration at the TeslaTech Conference will be a rare opportunity to see, touch, and understand how altering water at the atomic level may influence biological efficiency and performance!

Garrett Electrolyzer

US Patent 2,006,676 (1935)

Invent a ZPE Device from an Electrolyzer

Moray B King

Running an engine from electrolyzer gas is easy to invent once you know one fundamental principle: Dislodge the bubbles off the electrolyzer plates while they are still at a tiny sub-micron size. Here the bubbles are strong because they cocoon a net charge. The polarized water molecules comprising the bubble membrane interlock symmetrically as they are attracted toward the trapped interior charge. Once in the engine's combustion chamber, the strong bubbles support formation of sub-micron plasmoids that Ken Shoulders named "exotic vacuum objects" (EVO's) because they exhibit a huge, anomalous self-acceleration sourced from ZPE. They drive the piston with a large force well exceeding the force of hot air expansion from combustion. Hydrogen combustion provides the plasma needed to convert the strong bubbles into EVO plasmoids. This understanding begets a simple means to create a zero-point energy invention. Examples come from the history of inventors that purportedly ran cars and generators solely from water. They include Charles Garrett and Archie Blue. Both blew air across the plates to dislodge the bubbles. Also featured will be Stephan Barrie Chambers who used a special coil in the water above the electrolyzer plates to attract the charged bubbles off the plates and into turbulence.

Magnetic Motor-Generator Measurements and Zero Point!

Dr Thorsten Ludwig

Based on the magnetic motor-generator concepts of Raymond Kromrey and John Bedini, as well as ideas from Dr. Ludwig and others, test results on real hardware are reported. Different configurations of fields and hardware designs will be shown. Tests were conducted on large and small prototypes, some producing up to 3 kW. There is a deep connection between magnetism and Zero Point Energy (ZPE). Modern physics shows us that we live in a sea of energy called ZPE. The presenter has researched ZE for almost 30 years and has conducted numerous experiments. Most publications are available in open access. Dr. Ludwig will explain how ZPE can be transformed into real forces. The connection between ZPE and magnetism is discussed, especially in the context of magnetic motors with rotating fields. The magnetic Casimir effect will also be introduced.

Furthermore, updates will be provided on long-term projects to harness ZPE and quantum energy through the Casimir effect and structured surfaces, as well as experiments involving consciousness and Casimir forces. Building real hardware and conducting thorough testing are vital for progress in free energy research. Details on how the machines are built and how to test energy efficiency in electrical and thermal devices included. With new generations of digital oscilloscopes, it is more affordable to perform accurate measurements.

The Power and Signature of the Monopole Clutch

Bob Greenyer

In September 1931, Paul Dirac proposed the monopole in his seminal paper 'Quantised Singularities in the Electromagnetic Field.' Monopoles are the mirror image of electric charges that were necessary to restore symmetry to Maxwell's equations. Magnetic monopoles are necessary in quantum mechanics to allow electric charge to be quantised. Paul Dirac showed that even one monopole, anywhere in the universe, would force every electric charge to come in discrete multiples. The Dirac monopole, however, is actually a topological

monopole that cannot be smoothed away and at large distances appears like a point. In recent years these have been predicted and simulated in Bose-Einstein condensates.

At the extreme, such structures, with requisite flux intensity, can cause the collapse of baryons such as protons and neutrons. Over the past ten years it has been experimentally established that fractal electrodynamic structures can lead to the formation of magnetic charges in the form of topological monopoles. These are metastable structures in virial equilibrium in our vacuum energy state.

They have observable physical signatures which are seen in natural phenomena and a range of hitherto unexplained emerging technologies. They allow manipulation of matter—energy density as well as having clear propulsive properties. We examine signatures with predicted capabilities and their opportunities for a world of abundance.

THE LIVING POTENTIAL OF WATER

PRACTICAL APPLICATIONS OF BROWN'S GAS

WITH GEORGE WISEMAN

Real Science. Real Solutions.
Real Results.

Discover how hydrogen and advanced water technologies support health, vitality, and everyday performance.

Innovations you can see, touch, and experience.

Vortex Based Math, Sacred Geometry & the Blueprints of Creation

Gabrielle Ensign

Vortex based mathematics is the underlying coding language to everything in the universe, and gives instruction to all geometry and directs the movement and makeup of energy, matter, space and time. Vortex math and sacred geometry hold the keys to understanding the deeper secrets into physics, plasma (zero-point energy) technologies and quantum computers. It is also a spiritual language which defines Source and unity consciousness as the prime creator of all things and is clear evidence of intelligent design. Tesla recognized some of this but it was Marko Rodin who really recognized its deepest secrets and made the greatest discoveries which is now called vortex based mathematics.

Vortex math defines and operates through numerical constants like phi (1.618), the harmonics of space and time, frequency (resonance and vibration), the size and distance of celestial bodies in the solar system. The design and placement of ancient structures and megaliths are aspect of musical relationships, geometry and ratios, a function of electricity, magnetism and plasma physics, and is the prerequisite to all harmonic numbers spanning cultures throughout history underling the makeup of the entire universe. It is also the basis of all sacred geometry.

Marko's primary sequences and geometry relate to all of this and create all things. Several discoveries of my own that help prove this will be revealed!

Introducing Conscious Systems Engineering

Lynne Wainfan PhD

Nikola Tesla designed the machines that enabled the industrial age. Today, our challenge is not a lack of hardware, but the failure of our institutions to serve humanity. Our institutions have become kluges—clunky, stop-gap structures optimized for self-preservation rather than human benefit. Their failure cannot be prevented by repairing them; new systems must be designed.

Since Tesla's time, enabling shifts have occurred. Systems engineering developed to achieve unprecedented goals like the Moon landing, is now a mature discipline for designing new types of systems. Furthermore, quantum physics is providing evidence and models for extraordinary phenomena Tesla described as accessing a "Universal Core."

Conscious Systems Engineering is called "conscious" since it involves the intentional creation of new architectures, and also because we recognize consciousness as a field that may be accessed for extraordinary outcomes. CSE combines aerospace rigor with field-based and resonance-driven quantum-physics models, operationalizes collective intelligence rather than siloed specialization, replaces the "human-as-component" model with a design philosophy that respects the inherent dignity and creative potential of the people the system serves. By moving beyond failing institutions and toward CSE systems, we step into a new phase of human agency... expanding the human potential!

Tesla's Visionary Future and Conscious Evolution

Suzanne Price

Tesla projected an extraordinary vision of free wireless power for all mankind. Although it was not realized in his lifetime, he may be astonished to see the grander picture he set in motion... acceleration of conscious awareness within the species. Homo Sapiens is now becoming Homo Telepathensis as we prepare to more fully explore the multiverse of Self and the collective.

The human fossil and cultural records of antiquity clearly show mankind's story has been driven by technology, from crude stone tools to spaceships traveling the stars; from simple radios to global satellite communications. As humans follow this inevitable trajectory, we also see the expansion of the brain's extra-sensory innate abilities, enabling extraordinary creativity, innovation and challenges.

Tesla's alternating current and wireless energy discoveries catapulted world culture into the 21st century and beyond with his insights into the 'wheelworks of Nature'. Progress continues to unfold among independent researchers and inventors who contribute to the further understanding of energy, consciousness and their many applications beyond the Standard Scientific Model. Here we trace multiple threads to unravel the greater impact of Tesla's work now and into future millennia. They address Tesla's research precipitating an elegant Theory of Everything... and more!

Vibes Measured

Everyone is talking about theories of energy, frequency, and vibration.

At Relax Sauna, we make that conversation practical. Our far infrared technology is engineered to deliver clean, targeted wavelengths that vibrate the body's water-rich tissues. That means more energy, a deeper sweat response at lower temperatures, and a more comfortable path to circulation, relaxation, recovery, and whole-body wellness.

This is not vague energy talk. It is wavelength-driven wellness, grounded in how the body actually responds to far infrared light.

You're not tired, you're uncharged.

Inside every cell is water, but not just any water, it's H3O2, Phase 4 water that stores far infrared light and converts it into usable energy.

When far infrared enters your tissues, it excites water molecules, increasing structured water over 50%. That's your biological battery recharged.

Muscles recover faster, skin glows brighter, sleep runs deeper, detoxification accelerates, every reaction inside you powers up.

Far infrared: your body's original charger.

Stimulants and energy drinks wear off, but when your water is structured, your body becomes its own power plant.

FDA Registered Class 2 Medical

FSA & HSA Eligible

It's not just healing, it's smart business. Sessions are quick, high margin, and keep patients coming back.

2026 ExtraOrdinary Technology Conference

Albuquerque, NM • August 12 - 16

Conference Early PreRegistration Form

Information so HOT... it NEEDS to be Suppressed!

Register by Jun 30, 2026 for 25% Discount on Registration!

Nikola Tesla set the stage for unparalleled technological advances in the 20th Century and the new millennium. In the tradition of Tesla, many of our researchers will be presenting new concepts that go against the status quo. Speaking slots are limited with priority going to those who have WORKING HARDWARE! We challenge you to come and see many of these advanced concepts demonstrated at this conference.... *many of them are so unbelievable, you have to see them for yourself!!!*

- Tesla Technology
- Tesla Coils
- High Energy Physics
- Scalar Technology
- Alternative Energy
- Fuel Saving Products
- Alternative Medicine
- New Health Products
- Extreme Physics

Get inside technical information you won't find on the internet!

Conference Notes:

- **Video Recordings.** DVDs will be available during and after the conference. *Private taping is not allowed.* Conference fees do not include DVDs.
- **Family Discounts.** Spouse rates available to immediate family accompanied by *members*.
- **Individual Sessions.** Individual session rates are available at the door on a *space available* basis only.
- **Hotel: Crowne Plaza...** includes free breakfast buffet and free internet.. This **IS** the best price/service combination possible and convenient..
- **Make your reservations early** at TeslaTech's special group rate starting at \$129 per nite.
- **Refund Policy.** Exchange only.. no cash refunds. Service fee of \$25 on all refunds. Refund credit for goods/services produced by TeslaTech only.

Cancellations after Jul 31, 2026 & "No Shows" are non-refundable

Send check/money order in United States funds to:

TeslaTech
70 Piute Valley Dr 574
CalNevAri, NV 89039

Or CALL (520) 463-1994 with your MASTERCARD, or VISA order!

Conference PreRegistration Rates

Type Attendee	Rate	# Att	Cost
Member/Nonmember	\$ 450 ⁰⁰		
Spouse	\$ 400 ⁰⁰		
Students	\$ 200 ⁰⁰		
Teens (19 and under)	FREE		
Wed Workshop	\$ 50 ⁰⁰		

List spouse/student/additional attendees:

TeslaTech Member Register Discounts

- ~~35%~~ - before Jan 31
 - 30% - before May 31
 - 25% - before Jun 30
 - 20% - before Jul 31
- Door subject to space availability!
