

## **DNA Renewal**

### **Reversing Time Through Plants, Sleep & Dreams**

**Uri Lee**

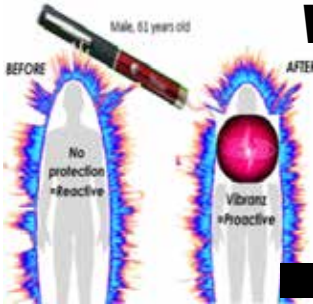

Advances in epigenetics and regenerative science are revealing that our DNA is not a fixed blueprint, but a dynamic system influenced by environment, lifestyle, and states of consciousness. Subconscious and ancestral imprints... encoded in DNA, epigenetic expression, and the biofield—contribute to aging, illness, and stagnation. Some of the most powerful processes of cellular repair occur during deep sleep... when the brain clears toxins, the nervous system resets, and the body activates

natural pathways of regeneration. Restorative sleep, dreams, and sacred plants may support the body's innate renewal processes. Dreaming is both a biological and psychological process that helps reorganize memory, release emotional stress, and restore cognitive balance. When combined with intentional practices and plant-based support, dreaming and healthy sleep patterns may become powerful keys for healing, creativity, and expanded consciousness.

Combining spiritual intent with healing frequency technologies aligned with Tesla's principles of energy, frequency, and vibration, results in pathways of anti-aging, expanded consciousness, and renewal being unlocked. Attendees will gain practical insights into improving sleep quality, enhancing dream awareness, supporting nervous system balance, and creating daily rituals that align biology, consciousness, and longevity.

## **Witness Age Reversal with the InfraRed Laser ReVitalazers**

**Joe Blanton**

Vibranz programmed ReVitalazers can bring actual cellular repair in the moment on a new injury! Vibranz harnesses the power of sacred geometry and uses quantum field zero-point technology to add Human Blueprint Frequencies into each laser to create a symphony of frequencies which stimulate the Mitochondria in our cells to produce more ATP (about 30-35% more life-force energy) so that cells have the energy to do their work.

Dr. Doug Wallace claims ALL Aging and most illnesses are simply too many dysfunctional mitochondria that do not produce enough energy for their cells to work. New discoveries show there are free-floating mitochondria in our blood. I will show how the Red/InfraRed, Green, and Violet/Blue ReVitalazers all have a unique impact on the mitochondria to not only produce more ATP, but also cause healthier protein folding and further stimulate stem cell production.

GDV BioPhotonic camera science shows how ReVitalazers take about 30 seconds to add about 30-35% more life force energy. Dr. Jack Kruse says we need to "Optimize our Light, Water and Magnetism". The Red/InfraRed, Green and Violet/Blue lasers replicate sunshine to our bodies with every photon in the laser beam energetically giving up an electron into our body's water/blood just as sunshine charges the water in our system!

## **Tesla Scalar Healing Technology**

**Design & Concept Based on Tesla's Research...**

**Micha Eizen**

*What if your intention could be amplified... and reach anywhere?* Nearly a century ago, pioneers like Thomas Galen Hieronymus demonstrated that a simple photo and a focused intent could influence crops miles away—eliminating disease without physical contact. Tesla's Scalar Healing Machine takes that idea further.

This device is designed to amplify intention—up to 30 times—while removing the complexity typically required in radionics. The machine can either

treat a local user that holds two copper rods, connected to the machine... or it can do remote healing to a specific target (individual/ object/ area/ crop field). Furthermore, this machine has a skin treatment feature, which can accelerate wound/surgery healing, remove wrinkles, by using the Iontophoresis phenomenon, by conducting very low current through the skin.

Professor Haralick used this device to research the hypothesis that the conscious intention of the experimenter can imprint water and crystals. His well documented results on the ability to change the electromagnetic characteristic properties of water with his intent was presented in prior TeslaTech conferences.

In this presentation, you won't just hear about Tesla's Scalar Device—you'll see its components, understand it, and learn how to use it!
