

Tesla's Health Giver

Famous Electrician Proposes to Drive Out All Bodily Ailments

Jeffery Hayes

The headline of the January 18, 1896 edition of the *Detroit Free Press*, introduced and defined what Nikola Tesla described as one of his most advanced applications of energy for human benefit... Low Frequency PLSF (Pulsed Longitudinal Scalar Fields). Declared at the time as Tesla's "Health Giver" it remains to date his most advanced healing modality. This innovation marked significant evolution beyond his earlier devices allowing an intimate immersion into the healing circuit.

Obsoleting his previous efforts with improved safety and effectiveness... most notably through the elimination of the radio frequency (RF) carrier... Tesla's approach enabled a low frequency, high-potential system to be capable of producing whole body biphasic effects that were previously unattainable within earlier RF driven MWO designs.

Tesla's electrotherapy science has long been suppressed. However, a modern revolution has been occurring with electrotherapy making an amazing recovery after almost complete elimination by the medical cartel. Currently electrotherapy is adopted in many applications by conventional medicine. Today, this legacy is being reimagined. TeslaGo systems embody Tesla's original vision: elegant, portable, high potential oscillators designed for modern application. TeslaGo is the next expression of Tesla's enduring pursuit of energy, frequency, and vibration in service of life.

Far Infrared Health Keys

Research Leads to Natural Healing Saunas!

Phil Wilson

Heat for purification, for healing, and for achieving optimum health is an ancient tradition. Sweat lodges, Roman spas, and Nordic saunas relied on fire to provide heat. Natural hot springs located around the world were provided heat from magma within the earth... some of the most famous being in Japan. The healing invisible yet powerful heat source was identified as far infrared (FIR). Led by NASA, researchers developed far infrared panels for deep space applications, designed to stimulate circulation and promote tissue

repair in astronauts facing muscle atrophy in zero gravity. This discovery laid the foundation for far infrared saunas, therapeutic devices, and medical applications worldwide.

Since then, the goal was to transform electricity into a precise, therapeutic FIR frequency that could mimic this healing environment—a challenge that took over a decade to perfect. Now semi-conductor chips filter out the near and mid infrared energies to generate a pure far infrared energy between 4-14 microns. Only this energy resonates with our water molecules and organic cells. You can touch the heater units directly with tissue paper... and it will not burn!

An infrared sauna sends infrared energy into the body which penetrates instantly. The Relax far infrared sauna increases core temperature, and provides *immediate pain relief!*

Engaging the Universal Clutch on Wheelwork of Nature

Paul Harris

Paul provides a pathway to perfect health and limitless sustainable energy, Future energy and health technologies using *plasma* to combine light and sound frequencies with both electro-magnetic and magneto-dielectric fields to achieve unlimited energy and holistic wellness.

Considered by many as a "MedBed" type device, Theraphi utilizes Tesla technology to envelop the body in a coherent electrostatic field of Plasmoids both within and surrounding the body using the Theraphi... which is recognized as the most advanced Plasma Wave therapy device. Phi-ratio-

harmonic-cascade-induced longitudinal plasma waves and their resultant superluminal phase-conjugate (time-reversed) negative entropy, is the key to well being and healing. A related device, the Quantaphi is designed to be used as a room conditioner for sacred space, meditation and as a hifi sound system which conditions the space for audio clarity. Many aspects of EMF protection is achieved. The Quantaphi uses plasma technology to create a radiant field and allows you to fill that field with what ever sound you like.

Paul's comprehensive understanding of how energy fields affect biological systems led to the development of these plasma-based technologies. Find out how plasma, plasmoids, ball lightning and exotic vacuum objects lead to coherent energy transformations which validates the philosophers of old with new understanding of the nature of matter, electricity, magnetism, gravity, space and time.
