

PRE CONFERENCE ACTIVITY

Thursday Afternoon

Thu Jul 29 • 1PM-3PM

Development of New Power Paradigms

Vernon Roth

The field of power generation is taking off in many directions. But why now? Free energy has been available for the last hundred years. Water based energy has been seen as a viable power supplement in the mainstream. Un-counted magnetic enthusiasts are driven to build motor after motor. The same can be said of Rodin coils. Black hole technology is in development. A new paradigm allows the creation of these technologies. However, that paradigm cannot be fear, but must be one of creation.

Join us as we explore the intricacies of HHO production. Hard lessons will be presented and their secrets shared. We will take a guided tour of our field installations of Hydrogen devices and show the willingness of industry to accept this fifty year old (or more), technology. As a side quest, we will show the application of magnetic current and Rodin coils to Hydrogen on demand.

POST CONFERENCE ACTIVITY

Sunday Afternoon

Sun Aug 1 • 1PM-3PM

GEET Seminar

Paul Pantone

The first working prototype was developed long before the technical analysis was attempted. Plasma research is a fairly new field of acceptable science. The technology used in the GEET Fuel Processor is a combination of the most basic scientific principles, most of which falls within the normal rules and of thermodynamics. But some of the 70 simultaneous phenomenon are not found in those books, since it is the combination of events, which is the body of this discovery. Put quite simply, the exhaust heat is transferred to the incoming fuel vapor, which must be maintained in a vacuum, and the overall configuration provides a molecular breakdown within the vacuum of all of the heavier elements. Therefore, intensifying the vacuum, the speed of molecular breakdown or reaction is magnified, and less heat is required.

High gas prices and high pollution levels are a modern plague... and GEET is the solution. Engines running on GEET technology have consistently shown tremendous reductions in emissions. Early efforts for this groundbreaking experimental technology centered on small engines. Now, plans are even available for automobiles.

Conference AfterHours ...

Friday Jul 30 - 7PM From Invention to the Market!

David Schmidt

A MUST SEE presentation for those of us who dream about starting and running our own company!!!

This talk is geared to helping inventors get their products to the market place. David Schmidt will discuss the obstacles that inventors face and he will provide information and solutions as regards to patent application, incorporation, setting up a company (legal, accounting, operations), the need to obtain solid market research about target industries, development of a business plan, finding and creating a team of professionals, funding, product development, importance of well designed prototypes, and creating professional marketing materials.

David Schmidt is the CEO of LifeWave, a global company, with distribution in over 80 countries, and sales in excess of \$100 Million. He has over two decades of experience as both an accomplished inventor and businessman. He recognizes that most inventors do not know how to navigate through the pitfalls and paranoia that prevent inventors from achieving financial success. However, his experience in successfully commercializing LifeWave Technology (the activation of biochemical processes using specific wavelengths of light) is helpful to other inventors encountering similar obstacles.

Saturday Jul 31 - 7PM

Overview of the Rodin Solution

Marko Rodin

I have discovered the source of the non-decaying spin of the electron. - Mark Rodin

Prime Number Symmetry Generation in Rodin Coil Design

Marko Rodin was originally selected in 1988 by Defense Science Magazine to present his findings at Air Space America under the scientific topic of Space Power Propulsion Systems on behalf of the United States government and will be sharing the most recently made advances in Rodin Coil model design and Vortex Based Mathematics technologically for antennae, portable power generation, computer artificial intelligence, 3D speakers, electric cars, and an in depth explanation into how to end all diseases and produce unlimited food crops by harnessing the heretofore undetectable Morphogenetic Field Bio-Aetheric Template contained within DNA and is responsible for all gene expression.

There will also be a live demonstration of the newly released Rodin Coil four conductor and six conductor model design.
